

# Turriff Sustainability Club Pollinator Garden

# Our Journey so Far...

- In the 12 school weeks since receiving the funding from the Boyndie Wind Farm Cooperative we have been busy planning the most effective way of implementing our pollinator garden
- During this challenging time moving out of the pandemic and into our first exam session since 2019, we have spent time learning about plants so that we can select the best species to bring colour and pollinating insects to our school quad.

# Planting Schedule

We have created a planting schedule so that we know how best to maintain our garden for years to come!

Our first order of plants is on its way, and we have been busy preparing our planters for their arrival.

Planting timeline	Type of plant	Flowering time	When to buy
Spring	Wildflower Seeds Lavender Heather Aster Milkweed Chives  Thyme Hebe	Mixed June-August Sept- Nov Autumn July- Sept Late spring/June- July Spring Summer	May
Autumn- Sept	Daffodils Hyacinth Bluebells	Following April March-April April	Sept
Autumn- Oct/Nov	Tulips Snow drops Crocuses	Mid to late spring Jan-March Late winter-early spring	Sept

# Planters in the Quad

We are well on our way to setting up our garden, which we hope will flower for years to come. We look forward to updating you with our progress in the coming months!
